Taxonomic Novelties Published in Selbyana, Volumes 1–21 (1975–2000)

Compiled by Bruce K. Holst and Patsy Worley

Marie Selby Botanical Gardens, 811 South Palm Ave. Sarasota, FL 34236 USA.
E-mail: bholst@selby.org

During its first 25 years, Selbyana has published the original descriptions of 675 new plant genera, species, and infraspecies for science. The following list includes these in alphabetical order by plant family, genus, and species names. A few nomina novae are included, but names of new status and new combinations are not. Also provided here are the volume, issue, page number, and year of publication, country of origin of each type, collector(s), collection number, and where the types were designated for deposit.

Abbreviations used: HT = Holotype, IT = Isotype, LT = Lectotype, NT = Neotype, INT = Isoneotype. Herbarium abbreviations follow Index Herbariorum, 8th Edition, New York Botanical Garden, New York.
